CGPA: 7.64/10

EXPERIENCE

Full-Stack Engineer & R&D Contributor — 404 Studios

Apr 2026 – Present

- Founding member of a 5-person studio building animated, high-end frontend websites for established companies using **Next.js** and **React**; currently working with early-stage startups as well.

Software Engineer Intern — Kode Astra (Tart Labs)

Apr 2026 – May 2026

- Built and shipped an AI-powered support automation product end-to-end (Zoho SalesIQ + Desk integration), reducing manual query triaging by **~60%**.
- Designed the LLM evaluation layer using LiteLLM and LangFuse with LLM-as-judge scoring, going from problem to working pipeline in a fast-paced startup environment.

PROJECTS

CUSTOS — Cloud-Native Pre-Trade Risk & Regulatory Intelligence Platform *(Fully Deployed)* [GitHub](#)

Python, Azure (Event Hubs, Functions, AI Search, Redis, Blob Storage), OpenAI GPT-4o, RAG, React

- Solo-built and deployed a 4-module RegTech platform end-to-end — from architecture to live Azure infrastructure to a working dashboard — across 9 cloud services on a single subscription.
- Shipped an AI module that extracts structured trading rules from regulatory PDFs via LLM and pushes them live, enforced on the very next trade within milliseconds.
- Built a dual-model ML anomaly detection system (IsolationForest + PyTorch Autoencoder) and a CI/CD pipeline deploying the React frontend automatically on every push.

Relay — Fault-Tolerant Distributed Webhook Orchestrator

[GitHub](#)

FastAPI, PostgreSQL, Redis, Celery, Docker, Prometheus, Python

- Built a production-style async event delivery system solo, from data model to deployment, achieving **~99% delivery reliability** with retries, backoff, and dead-letter handling.

TechTrendGPT — RAG AI Chatbot

[GitHub](#)

Next.js, TypeScript, LangChain, Vector Databases, OpenAI API

- Shipped a full-stack RAG chatbot from idea to working product, with streaming responses and automated content refresh requiring zero manual updates.

Entitled — Privileged Access Management (PAM) Platform

[GitHub](#)

FastAPI, PostgreSQL, JWT, AES-256, TOTP MFA, Python

- Designed and built a security-focused backend product with RBAC, JIT privilege elevation, and full audit logging.
