

Aravind Nair

Senior Software Engineer · Backend & Distributed Systems

482 Clementina Street, Apt 5B, San Francisco, CA 94103 | +1 (415) 555-0142 | aravind.nair@gmail.com
linkedin.com/in/aravindnair | github.com/anair-dev | aravindnair.dev

Summary

Senior engineer with 8+ years building high-throughput backend services in Python, Java, and Go. Originally from Brooklyn, now based in San Francisco. Comfortable owning systems end to end — from API design and data modeling to Kubernetes deployment and on-call. Open-source contributor and occasional conference speaker.

Experience

Staff Software Engineer — Brightwave Analytics

San Francisco, CA · Mar 2022 – Present

- Lead the data-ingestion platform processing 4B events/day; cut p99 latency 38% by redesigning the queue topology.
- Mentored a team of five; introduced a design-review process now used across engineering.
- Worked closely with product lead Jordan Wells to ship the real-time analytics API.

Software Engineer — Google

Mountain View, CA · Jul 2018 – Feb 2022

- Built internal tooling for the Cloud Storage team; contributed to two patents.
- Migrated a monolith to gRPC microservices serving 12M daily users.

Backend Engineer — Stripe

Remote · Aug 2016 – Jun 2018

- Developed fraud-scoring pipelines in Scala. Integrated with partner APIs including PayPal and Plaid.

Selected Projects

- **Project Helios** — an open-source distributed scheduler (github.com/anair-dev/helios), 2.4k stars. Built in Go with a Raft-based control plane.
- **Quill** — a Markdown note app built with React and SQLite, featured on Hacker News.

Skills

Languages: Python, Java, Go, TypeScript, Scala, SQL

Infrastructure: Kubernetes, Docker, PostgreSQL, Kafka, Redis, AWS, Terraform

Frameworks: React, FastAPI, Spring Boot, gRPC

Education

M.S. Computer Science, Stanford University — 2016

B.S. Computer Science, University of Illinois Urbana-Champaign — 2014

Certifications

AWS Certified Solutions Architect (2023) · Certified Kubernetes Administrator (2022)
